

Project Executable Files

Date	1 October 2026
Team ID	SWTID-2026-1235
Project Name	EduGenie: Google Gemini Powered Learning Assistant
Maximum Marks	3 Marks

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes/No/NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide	Yes
3	requirements.txt / package.json	Yes
4	Database schema / seed files	NA
5	Environment configuration file (.env.example)	No/To be added
6	Deployed application URL	NA – Runs locally
7	APK / Executable binary	NA
8	Dockerfile / Containerization config	NA
9	Test files and test results	Yes
10	Demo video or walkthrough	Yes

Step 2: File / Folder Structure

```
EduGenie/
├── static/
│   ├── css/
│   └── js/
│   └── ...
├── templates/
│   └── ...
├── tests/
│   └── ...
├── .gitignore
├── README.md
├── check_setup.py
├── diagram_module.py
├── explanation_module.py
├── gemini_client.py
├── learning_path.py
├── main.py
├── qna.py
├── quiz_module.py
├── requirements.txt
└── summary_module.py
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	http://127.0.0.1:8000 — Local
Login Credentials (Demo)	Not required
Platform / Hosting Provider	Local development environment using Uvicorn / FastAPI
Repository Link	https://github.com/charu-works/Edugenie
Demo Video Link	https://drive.google.com/drive/folders/1eWcKB80j5CY6gh1eC2TdJiWAxrcrKhoq

Step 4: Run Instructions

1. Clone the repository

```
git clone https://github.com/charu-works/Edugenie.git
```

2. Navigate to the project folder

```
cd Edugenie
```

3. Create a virtual environment

```
python -m venv venv
```

4. Activate the virtual environment

Windows:

```
venv\Scripts\activate
```

5. Install the required dependencies

```
pip install -r requirements.txt
```

6. Create a .env file in the project root and add your Gemini API key

```
GEMINI_API_KEY=your_api_key_here
```

7. Start the FastAPI application

```
python -m uvicorn main:app --reload
```

8. Open the application in a browser

```
http://127.0.0.1:8000
```

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Depends on internet access and Google Gemini API availability/quota	Display an appropriate error message and retry when the service is available
2	Requires a valid Gemini API key	Configure GEMINI_API_KEY in the .env file
3	No user authentication/login system	Planned as a future enhancement
4	No persistent user history/database	Planned as a future enhancement
5	Application currently runs locally and is not deployed to a public server	Can be deployed to a cloud platform as a future enhancement
6	AI-generated responses may vary depending on the Gemini model/API response	User should verify important information
